

Dr. Neeraj Dwivedi is presently employed as a Principal Scientist at the CSIR-Advanced Materials and Processes Research Institute (CSIR-AMPRI) in Bhopal, India, while also serving as an Associate Professor at the Academy of Scientific and Innovative Research (AcSIR), Ghaziabad, India. His research interests are centered on ultrathin and thin films, shape memory polymers, and two-dimensional materials, which find applications in tribology, corrosion protection, sensor technology, surface passivation of solar cells, quantum electronic transport, field emission, and antimicrobial solutions. He has published over 125 research papers in reputable international journals.
